SÖZENLER

H. Osman Sözen
Gümüşhane 1917 - Trabzon 2014

“Ahşaba dokun...”

“Feel the wood...”

SÖZENLER;

1953 yılında H.Osman SÖZEN tarafından Türkiye'nin Trabzon şehrinde kuruldu. 25 yıl kendi imkanlarıyla kerestecilik, marangozluk ve müteahhitlik faaliyetlerini yürütüp, 1978 yılında, inşaat mühendisi oğlu Muhammet SÖZEN'i yönetim kurulu başkanlığına getirdi. 80'li yıllarda Trabzon ve Doğu Karadeniz pazarına hitap eden firmamız, 90'lı yıllarda üretimin yanında ithalat ve ihracat yaparak, Türkiye ve Uluslararası pazarda boy göstermeye başladı. 2000'li yıllarda birçok sektörde faaliyet göstermesine rağmen "Orman Ürünleri" alanından hiç ayrılmadı ve her geçen gün yenilikler yaparak sektörde ve ülkemize hizmet etti. 3. Nesil Sözenlerin de işe dahil olmasıyla katma değerli orman ürünleri üretiminde yol alan firmamız 2016 yılında "SZN WOOD" markasını oluşturdu. Günümüzde; Kereste, Doğal Ahşap Mobilya, Sandalye, Ahşap Profil vb. ürünler üretirken, yapı malzemeleri satışı ve taahhüt işlerini de yürütmektedir.

SZN WOOD;

1953 yılından bugüne gelen ahşap ürünleri ve ahşap işleme teknolojileri tecrübeimizi, Mobilya sektörünün en zor kısmı olan "%100 doğal ahşap mobilya" üretiminde kullanmak istedik. "SZN WOOD" markası ile yola çıkarken, üretimimizin tamamında "Doğal Ahşap" kullanmayı ilke edindik. Devlet ihalelerinden aldığımz tomruk hammaddesini, "ORMANDAN EVİNİZE" sloganıyla baştan sona üretimini yaparak en kusursuz haliyle size sunmaya çalışıyoruz. Her ağaç türünün kendine özgü renginin, biçiminin vb. fiziksel özellikleri yanında, kendine özgü reaksiyonları ve kimyasal özellikleri de vardır. Bu özellikler, ürünün kullanım yerinde, tasarımda, uygulanacak yüzey işlemlerinde çok önemlidir. "SZN WOOD" markasını diğer markalardan ayıran en temel fark ta budur.

- Kullandığımız ağaç hammaddelerinin tamamı Yüksek Frekanslı Vakumlu (HF Vacuum) sistemle kurutulmaktadır.

SÖZENLER;

Founded by H. Osman SÖZEN in Trabzon, Turkey in 1953, Sözenler operated independently in the fields of timber trading, carpentry, and contracting for 25 years. In 1978, Muhammet SÖZEN, an architect, took over as the chairman of the board. In the 1980s, our company served the Trabzon and Eastern Black Sea markets, and in the 1990s, we began to make our mark in Turkey and the international market through production, import, and export. Despite engaging in various sectors in the 2000s, we have always stayed true to the "Forest Products" industry and continuously served our industry and country by introducing innovations. In 2016, with the inclusion of the third generation of the Sözen family, our company embarked on producing value-added forest products under the "SZN WOOD" brand. Today, we manufacture products such as timber, natural wood furniture, chairs, wooden profiles, and also engage in the sales of construction materials and contracting services.

SZN WOOD;

We wanted to utilize our experience in wood products and wood processing technologies that date back to 1953 in the most challenging part of the furniture industry, which is the production of "100% natural wood furniture." When we embarked on the journey with the "SZN WOOD" brand, we made it a principle to use "Natural Wood" in all of our production. Starting from the raw timber obtained from government tenders, we strive to present it to you in its most impeccable form with the slogan "FROM THE FOREST TO YOUR HOME." Each tree species has its unique color, shape, and other physical characteristics, as well as its distinct reactions and chemical properties. These properties play a crucial role in the product's usage, design, and surface treatments. This is the fundamental difference that sets the "SZN WOOD" brand apart from others.

- All the timber materials we use are dried using the High-Frequency Vacuum (HF Vacuum) system.

Ağaç Cinsleri / Tree Species

Ladin;

Genellikle Türkiye'nin Doğu Karadeniz bölgesinde, deniz seviyesinden 2000 metrenin üzerine çıkan yüksekliklerde özellikle dağların denize bakan yamaçlarında yetişen iğne yapraklı bir ağaç türüdür.
450-650kg/m³

Spruce;

Typically found in the eastern Black Sea region of Turkey, is a coniferous tree species that grows on the slopes of mountains facing the sea, at altitudes exceeding 2000 meters above sea level. It has needle-like leaves.
450-650 kg/m³.

Kestane;

Türkiye de, Karadeniz ve Marmara bölgesinde yaygın olarak görülen, dayanıklı oduna sahip yapraklı bir ağaç türüdür.
550-750kg/m³

Chestnut;

It is a leafy tree species with durable wood that is commonly found in the Black Sea and Marmara regions of Turkey.
550-750kg/m³

Ceviz;

Türkiye de, Karadeniz, Doğu Anadolu ve Trakya bölgelerinde görülen, Dayanıklı ve değerli oduna sahip yapraklı bir ağaç türüdür.
550-750kg/m³

Walnut;

It is a leafy tree species with durable and valuable wood that is commonly found in the Black Sea, Eastern Anatolia, and Thrace regions of Turkey.
550-750kg/m³

Yüzey İşlemleri / Surface Treatments

Eskitme Yüzey:

Genellikle iğne yapraklı ağaç türlerinde uyguladığımız bu tekniğin asıl amacı, yumuşak olan ilkbahar odunu aşındırarak, 3 boyutlu ve daha sert bir yüzey elde etmektir. Bu işlemi fakli türde fırçalar kullanarak ve kendimize özgü tasarladığımız özel makinalar ile yapıyoruz.

Brushed Surface;

The purpose of this technique, which is commonly applied to coniferous tree species, is primarily to enhance the surface by removing the softer springwood and obtaining a three-dimensional and harder surface. We perform this process using various types of brushes and special machines that we have designed specifically for this purpose.

Testere Yüzey:

Ağaç malzemenin enine yönünde yaptığımiz testere yüzeyinin asıl amacı eski üretim tekniklerini yansıtma çalısmaktır. Farklı makine ve testerelerle yaptığımiz bu yüzey sayesinde daha otantik ürünler elde etmekteyiz.

Saw Surface;

The primary purpose of the sawn surface that we create in the transverse direction of the wood material is to reflect traditional production techniques. By using different machines and saws to achieve this surface, we are able to obtain more authentic products with a rustic appeal.

Yaşlandırma Yüzey:

Bu teknikte tamamen ilkel el aletleri ve insan gücü kullanıyoruz. Bu sayede hem enerji tasarrufu yaparken hem de birbirinden benzersiz ürünler üretebiliyoruz. Bu teknikle üretilen ürünler, eski çağlardan günümüze gelmiş mobilyalar gibi görünür.

Aged Surface;

In this technique, we completely rely on primitive hand tools and human labor. This allows us to achieve both energy efficiency and the production of unique products. The items produced using this technique resemble furniture that has survived from ancient times to the present day.

Düz Yüzey:

Ürün yüzeyinde sadece zımpara yapılmıştır. Zımpara kum derecesi ürüne göre farklılık göstermekte olup 180 ile 2000 kum arası değişebilir.

Flat Surface;

The product surface has only been sanded. The sandpaper grit size can vary depending on the product, ranging from 180 to 2000 grit.

Renk Kodları

Uyarı: Ahşap renklerindeki tonlar, ağaçın yetiştiği bölgeye, üretilen mevsime vb birçok etkene dayalı olarak farklılıklar gösterebilir.

1-SZN01-Black:
Su bazlı yarı örtücü boyalı

2-SZN02-Krem:
Su bazlı yarı örtücü boyalı

3-SZN51-Teak:
Su bazlı yarı örtücü boyalı

4-SZN66-Irish Green:
Su bazlı yarı örtücü boyalı

5-SZN72-Koyu Ceviz:
Su bazlı yarı örtücü boyalı

6- Özel Renkler

a-Step:
Düşük reçineli beyaz patina boyanın
üzerine su bazlı yarı örtücü boyalı
sürülüp fırçalanarak oluşan
özel bir renktir.

b- Tao:
Su bazlı örtücü siyah boyanın üzerine
düşük reçineli beyaz patina boyalı
ahşap yüzeyi. Kuruma işlemi tamamlandıktan sonra
yüksek kumlu zımpara ile temizlenerek
oluşan özel bir renktir.

c-Ganita:
Su bazlı yarı örtücü boyanın üzerine
su bazlı örtücü boyalı ahşap yüzeyi. Kuruma
işlemi tamamlandıktan sonra düşük
kumlu zımpara ile temizlenerek
oluşan özel bir renktir.

d- Sotka-Çanakkale-Boztepe-
Kingo-Hunter (Sandık):
Ürünlerin ahşap yüzeylerine, kendimize
özgü tekniklerle oluşturduğumuz karışımı
uygular ve yaklaşık 24 saat bekleriz.
Bu karışım, özellikle iğne yapraklı ağaçlar
icerisindeki ekstraktif maddelerle
reaksiyona girerek UV degradasyonuna
benzer bir renk oluşturur. Bu renk bir
pigment olmayıp tamamen kendine
özgü bir renktir. Rengin tonu, ağaçın
icerisindeki ekstraktif madde
yogunluğuna göre değişiklik
göstererek (Kahverengi, yeşil ve
gri tonları) gerçekten eski bir
ahşap görüntüsü sağlar.

g-Faroz:
Ham ahşabin üzerine düşük reçineli beyaz
patina boyalı ahşap yüzeyi. Kuruma işlemi
tamamlandıktan sonra yüksek kumlu zımpara
ile temizlenerek oluşan özel bir renktir.

Color Codes

Warning: The tones of wood colors can vary based on factors such as the region where the tree grows, the season of production, and many other variables.

1- SZN01-Black:
Water-based semi-opaque paint.

2- SZN02-Cream:
Water-based semi-opaque paint.

3- SZN51-Teak:
Water-based semi-opaque paint.

4- SZN66-Irish Green:
Water-based semi-opaque paint.

5- SZN72-Dark Walnut:
Water-based semi-opaque paint.

6- Custom Colors

a-Step:
The special color that is achieved by applying and brushing a water-based semi-opaque paint on top of a low-resin white patina paint.

b-Tao:
On water-based covering black paint, low-residue white patina paint is applied, and after the drying process is completed, it is cleared using high-grit sandpaper to achieve a special color.

c-Ganita:
Water-based semi-opaque paint is applied on top of water-based covering paint. After the drying process is completed, it is cleared using low-grit sandpaper to achieve a special color.

d-Sotka-Çanakkale-Boztepe-Kingo-Hunter (Box):
We apply a mixture that we create using our unique techniques to the wooden surfaces of the products and let it sit for approximately 24 hours. This mixture reacts with the extractive substances found particularly in needle-leaved trees, creating a color similar to UV degradation. This color is not a pigment but entirely unique to itself. The tone of the color varies depending on the density of extractive substances within the wood, resulting in shades of brown, green, and gray. It truly provides an aged wood appearance.

e-Moiso:
It is produced using the colors SZN01 and SZN51.

f- Kuzgun:
It is produced using the colors Step and SZN01.

g-Faroz:
A low-residue white patina paint is applied to the surface of raw wood. After the drying process is completed, it is cleared using high-grit sandpaper to achieve a special color.

h-Holefter:
An application of Black or White patina is done on top of SZN51. After the drying process is completed, it is cleared using high-grit sandpaper to achieve a special color.

i- Rose:
White patina application is done on top of SZN51. After the drying process is completed, it is cleared using high-grit sandpaper to achieve a special color.

Yüzey Malzemesi / Surface Material

1- Su Bazlı 10 Gloss Vernik / Water-based 10 gloss varnish

Kendi reçetemizle özel olarak ürettiğimiz, Su bazlı, yüksek reçine oranlı, kalın bir film tabakası oluşturan ve parlaklık derecesi 10 gloss (Mat) olan özel bir verniktir.

It is a special varnish that we have custom-produced based on our own recipe. It is water-based, has a high resin content, creates a thick film layer, and has a gloss level of 10 (Matte).

2- Akrilik Bazlı 5 Gloss Vernik / Acrylic Based 5 Gloss Varnish

Akrilik bazlı, düşük reçine oranlı, çok ince bir film tabakası oluşturan, doğallık hissiyatını en iyi veren ve parlaklık derecesi 5 gloss (ultra mat) olan özel bir verniktir.

It is a special varnish that is acrylic-based, has a low resin content, creates a very thin film layer, provides a natural feel, and has a gloss level of 5 (ultra matte).

3- Organik Yağ / Organic Oil

Yüzeyde hiç film tabakası oluşturmayan, ahşap malzemeyi besleyen ve zamanla bakım gerektiren %100 doğal bir yağdır.

It is a 100% natural oil that does not create any film layer on the surface, nourishes the wood material, and requires regular maintenance over time.

Sistemler / Systems

1- "U" demir / "U" Steel:

Genelde Demonte masa tablalarında kullanılır. Tablaların arka yüzeylerinde, tablaların baş kısmından 10-15cm içerde kalacak şekilde CNC ile kanallar açılır. Kanalların iç kısmına, 3-5 mm kalınlığında lazer kesim yapılarak üretilmiş bükümlü "U" demirler koyulur. Demirlerin uzunluğu kanal uzunluğundan %5 küçütür. "U" demirler masa tablasında açılan kanallara dübel ve civata sistemiyle bağlanır. "U" demirlerin civata bağlantısı yapılan slotlar, tablanın %5 sağa sola hareket edebilecek uzunluktadır. Bu demirler sayesinde masanızın dönme ve çatlama riski minimize edilmiş olur.

We usually use it on disassembled table tops. On the back surface of the tops, channels are CNC machined, which will be located about 10-15cm inside from the edge of the table. Inside these channels, twisted "U" Steel with a thickness of 3-5mm, produced by laser cutting, are placed. The length of the irons is 5% shorter than the channel length. The "U" Steel are attached to the channels on the table top using a dowel and bolt system. The slots where the bolts connect to the "U" Steel allow for a 5% movement to the left and right. By using these Steel, the risk of the table rotating and cracking is minimized.

2- Kızak Sistem / Sled System:

Genelde Metal masa ayaklarında kullanılır. Masa ayaklarımızın üzerinde, tablaların %5 sağa sola hareket edecek uzunlukta slotlar bulunur. Ayaklar tablalara dübel civata sistemi ile bağlanır. Kızak sistem sayesinde masa tablalarının çatlama riski minimize edilmiş olur.

We usually use it on our metal table legs. The table legs have slots that allow the table tops to move about 5% to the left and right. The legs are attached to the tops using a dowel and bolt system. The sliding system helps minimize the risk of the table tops cracking.
